**We accelerate the growth of your business**

Our team increases the speed with which the wheels of your business turn, accelerating development through brand promotion and other image or digital marketing solutions, productivity, accessible and efficient.

Since 2004, when the company based in Bucharest was founded, Biroul de image SRL has been a reliable partner of companies that need services and products from the web and IT fields, vector and raster graphic creation, print and advertising production, branding and company identity, digital marketing and social media.

After an organic scaling of the business and a need to expand the space, in 2015 we changed our headquarters in Ilfov to increase the space for our own advertising production workshop. However, we also continue to collaborate by outsourcing several activities in order to offer our clients access to as many types of services and products as possible using state-of-the-art technological solutions.

We will continue to give the same importance to our established customers and services, focusing our attention and efforts on finding the most effective solutions to bring our products and services to our customers, day by day.

## About ZoomAcad

Our company was founded in 2008 and has its registered office in Bucharest, in that year the fields of activity Cadastru and Intabulation, Geodesy, Cartography, Topography, GNSS and GIS, they would know an extraordinary momentum.

We are a team of professionals, led by authorized engineers in this field. In our country, the values matter and are paramount, so you will always find respect, professionalism, transparency, responsibility and the cadastre and tabulation services, topography, geodesy and GNSS that we provide are of high quality and at fair prices. We like to treat our clients equally, whether it is a natural or a legal person.

Relating to the needs of our clients, we have chosen to always offer free expert advice, promptness in the execution of cadastre and tabulation works. We own the latest equipment with very good precisions, the accuracy of the measurements being thus guaranteed, the quality of the topo-cadstral measurements, being found in the final results of the cadastre and tabulation documentation.

Every customer is important and every customer needs to feel important, and for us this fact matters. We learn every day from the experiences gained with the intaming works and we make it possible to translate what we learned into deeds, so our clients in Bucharest and not only will benefit from cadastre and quality intabulation services.

The services we offer cover the area of Bucharest and Ilfov, but some works we can also carry out the radius of Bucharest. Cadastru.biz represents the cadastre and tabulation company of sector 6 in Bucharest, but we also operate in sector 1, 2, 3, 4 or 5 and in Ilfov County. We cover a wide range of geodesic engineering services, including topography, geodesy, cadastre of specific information systems, but also computer-aided design.
